Introduction

These accountability statements supplement our 2019 Annual Report. They contain our management approach to material topics, data tables, explanations and notes. We selected the data and information based on its relevance to our business strategy, interest to stakeholders and effectiveness at demonstrating our impact. We used standard disclosures from the Global Reporting Initiative's (GRI) Sustainability Reporting Standards where applicable, including Financial Services Sector Supplement disclosures.

We collect and manage accountability data using a web-based data management system (UL360), which includes data quality controls. We choose to have key performance data and information externally verified.

Throughout these statements, we refer to additional data and information contained in the following documents. These are all available on annualreport.vancity.com:

- 2019 Annual Report
- Consolidated financial statements
- Greenhouse gas handbook and inventory report
- Glossary

We have listed definitions of key terms at the beginning of each section. Where a term is specific to a data table, we have included the definition as a footnote to the table.

People

Member profile and growth

Member and client profile

Members include people, businesses and organizations who choose to bank with Vancity credit union and/or Squamish Savings and hold Class B Membership shares, regardless of the amount of shares. Members with a balance of less than \$5 in Class B Membership shares need to hold at least one additional member activated financial account (excluding Shared Success Patronage accounts).

Member well-being and service experience (103-1, 103-2, 103-3)

Member feedback and service satisfaction (103-1, 103-2, 103-3)

Member feedback mechanisms (102-43)

We are committed to providing meaningful opportunities for members to provide feedback on their experience with Vancity, and to have input in setting the direction of the credit union.

Members can provide feedback through our branches, call centre, website, social media (such as Facebook and Twitter), as well as by mail and e-mail. Members can also attend and participate in our Annual General Meeting and run for or vote for our Board of Directors, subject to eligibility. In addition, we use surveys, online member panels, interviews and focus groups with members (and sometimes non-members) on various topics to inform our strategies, products and services.

As a credit union and a co-operative, our Board of Directors is accountable to our membership. Our members have the option to communicate their concerns to their Board. Members may also choose to communicate their concerns via an external party, such as our regulator the B.C. Financial Services Authority (BCFSA), Central 1, or the Better Business Bureau.

Our goal is to deal with member concerns in a timely manner, preferably by the employee who receives the complaint. We have a system which enables front-line employees to directly log complaints. Although not all complaints require formal logging and reporting, themes are discussed at various management meetings. We do formally track compliments and complaints that are received by the Board of Directors, the Office of the CEO, and/or the Chief Member Services Officer. These compliments and complaints are reported to Vancity’s Board of Directors on a quarterly basis. We have systems that allow us to track, monitor, and report member responses to significant issues as they arise, for example, branch closures or a significant change to a product or service.

Member concerns and complaints escalated to Board, Chief Executive Officer and Executive Lead (102-33, 102-34)

In 2019, member concerns and complaints decreased to 162. There had been an increase in complaints relating to the replacement of our banking system in November 2016.

Member satisfaction (102-43, 102-44)

We survey our personal members to measure their satisfaction with our products and services. Through a 'member experience tracking survey', we learn about the in-branch experiences of members who borrowed, invested or opened new accounts in branch in the previous week. This information is used to understand and improve our performance. Through annual, post-transactional in-branch and ad hoc surveys, we ask members for opinions on a range of other issues. We review results by diversity (gender, age, disability, ancestry, low-income, etc.) to help ensure we are meeting the needs of all our members and communities. For more details, see [2019 Annual Report](#) 'Member well-being and service experience,' p. 14.

¹ Data prior to 2017 has been restated to align with current-year methodology.

The score represents the percentage of members who responded 9 or 10 out of 10 to the following question: thinking about everything that you have experienced with Vancity in the past 6 months, how would you rate Vancity overall using a 10-point scale where "1" means "Poor" and "10" means "Superior".

The percentage of respondents answering "Don't know" for personal members in 2018 was zero.

The margin of error was +/- 3% at a 95% confidence level.

Likelihood to recommend score

In Central 1's 2019 Products & Services study, the "likelihood to recommend" score for B.C. credit unions was 61% and 35% for banks when the question is asked of their primary users (those who mainly bank with them). Vancity's score is based on both primary (those who mainly bank with us) and secondary users (those who have Vancity as a supplemental account).

The score represents the percentage of members who responded 9 or 10 out of 10 to the following question: on a scale from 1 to 10, where "1" means "not at all likely" and "10" means "extremely likely", how likely would you be to recommend Vancity if a colleague, friend, or business acquaintance asked you to recommend a financial institution? The margin of error was +/- 3% at a 95% confidence level.

Responsible marketing and selling (103-1, 103-2, 103-3)

Vancity is responsible for preserving our members' collective assets. Our goal is to provide members advice that is in their best long-term interests, including managing debt and using credit responsibly.

Mortgages and personal loans

We may say 'no' to a credit application because the level of credit risk is too high, but we are more likely to say, 'not right now' and provide alternative solutions to help applicants achieve their goals. We are also looking at creative ways to view members differently who might traditionally not have had access to credit. We do not want to provide credit or advice to members that puts them in a position of taking on debt they cannot afford if interest rates rise, but we also want to understand how credit can make a difference and we want to be inclusive of our membership.

For the retail loan portfolio (residential mortgages and personal loans), Vancity's underwriting methodologies and risk modeling are member-based rather than product-based. We review the member's capacity to repay the loan rather than relying exclusively on collateral. Decisions on consumer loans are based on an overall assessment of credit risk that considers factors such as debt levels relative to income.

Our policies encourage member-serving employees to work directly with members. Our residential mortgage process includes an advisory session as the first step in the application process to determine if debt is the best option for the member. We offer a variety of tools to help members understand the true costs and obligations of borrowing and build their wealth and well-being in ways that reflect their values.

Privacy (103-1, 103-2, 103-3)

Privacy issues are handled by our Corporate Privacy Office, which is overseen by our Chief Privacy Officer.

🔗 Protecting members' information vancity.com/PrivacyAndSecurity

Breaches of privacy and losses of member or client data (418-1)

In 2019, the number of substantiated incidents increased from the last calendar year. This is likely due to an increased awareness of the need to report privacy breaches to the Corporate Privacy Office, stemming from improved privacy training. Reasons for breaches generally include misdirected emails and letters, vendor or employee error.

		2019	2018	2017	2016	2015

Complaints from regulatory bodies	#	0	0	0	0	0
(Internally) identified leaks, thefts or losses of customer data	#	6	3	10	2	5

Percentage of employees who complete privacy training (205-2)

All employees are required to complete the online privacy training annually. Due to leaves of absence and employee turnover, it is not possible to obtain 100% within a reporting year.

To improve 2019's completion percentage, in 2018 the Privacy Office worked with Human Resources to improve the current privacy training courses. Frequent status reports to management will continue to be sent out to allow managers to encourage their employees to complete their compliance courses earlier in the year.

Financial literacy (103-1, 103-2, 103-3)

For our approach, see [2019 Annual Report](#) 'Financial literacy and advice', p. 15.

Financial literacy programs (PAS)

Our [financial literacy](#) programs are delivered by our employees and/or with community partners. Seminars and workshops include topics such as basic banking, investments, retirement and estate planning. Financial literacy seminars and programs help individuals learn about banking fundamentals, debt management, budgeting and strategies for saving and investing. Examples include: [Each One, Teach One](#), financial literacy seminars provided by our Wealth Solutions department, our partnerships with [Power Play Money Manager](#), and with Family Services of Greater Vancouver for the [Money Skills workshops](#).

In 2016, we partnered with the Canadian Credit Union Association (CCUA) to share the Each One, Teach One program with credit unions across Canada. There are now 100 credit unions that have certified trainers and together, we are delivering workshops across the country.

Number of people assisted with financial literacy (203-2) (SDG-8)

The number of people assisted with financial literacy went up in 2019. This is due to continued training of new employees, which generated opportunities for community workshops, as well as adding a live stream training option.

		2019	2018	2017	2016	2015

Number of people assisted includes participants in financial literacy seminars, presentations, workshops and webinars and is based on facilitator reporting.

Number of participants in skills building workshops for new business launched (SDG- 8)

In 2019, we relaunched our Each One Grow One workshop and are planning a self-serve online module. We will be training all our Small Business Advisors in order to have a bigger impact in our communities.

Access to basic financial services for everyone (103-1, 103-2, 103-3)

One of Vancity's guiding principles is to help enhance social justice and economic inclusion for our members and communities. Our Statement of Values and Commitments includes a commitment to provide access to basic financial products, services and education. We try to remove barriers to accessing banking and financial services.

For more on our approach, see [2019 Annual Report](#), 'Access to basic financial services for everyone,' p. 15.

Initiatives to improve access (FS13, FS14, PAS)

We offer products and services to help people living on low incomes or who are unable to access basic banking services, obtain credit within their means, build savings or buy a home.

We continue to look for innovative ways to recognize unique circumstances and develop programs that support access to banking and credit that have a positive community impact. We place an emphasis on supporting access to affordable housing and home ownership, and economic self-reliance. We are committed to working with First Nations governments and Indigenous not-for-profit organizations in their efforts to improve the standard of living of their members and help them achieve economic strength and independence. Through a partnership with PHS Community Services, at Pigeon Park Savings we serve around 4,500 individuals living on low incomes in Vancouver's Downtown Eastside – one of Canada's poorest neighbourhoods. We have a branch in the rural community of Cormorant Island near Port McNeil with our two partners, the 'Namgis First Nation and the Village of Alert Bay. We are the only financial institution with a presence in that community. Since 2016, we've had an on-site banking kiosk at the Immigrant Services Society, where we open bank accounts on arrival for refugees coming to Canada.

Data for Community Business loans were pulled from our Customer Relationship Management system. Data prior to 2016 was pulled from our banking system. This may affect comparability with historic data.

The breakdown for total value of loans is rounded to the nearest one million dollars.

Physical accessibility (FS14, PAS)

Our office and retail locations are accessible and inclusive for both members and employees. In addition to standard ramps, parking stalls, door operators and open knee spaces, features include automated teller machines (ATMs) with tactile keypads and walk-up ATMs have guided voice functionality. Corporate websites are designed to be accessible with use of screen-reading devices such as JAWS (Job Access With Speech). We train senior call-centre agents to provide TTY (text telephone) banking services to members with hearing disabilities. There are audio infrared and induction loops in our meeting rooms, training rooms and community stages, as well as at the sit-down wickets. Portable induction loop devices are available at every branch if needed while conducting business in offices. Care has been taken to also ensure contrasting colours/tones, and include emergency response equipment such as distress alarms in universal washrooms, as well as emergency evacuation chairs at all of the towers.

Tactile tape and braille hand rail identifiers in emergency exit stairwells at Vancity Centre have been integrated per our Emergency Evacuation program to ensure employees with visual impairments can exit the building independently should the need arise, or if they simply wish to take the stairs between floors. In order to ensure inclusive facilities for people of all gender identities and members using our community stages, over 200 washroom, shower, and change facilities have been identified as “Inclusive” facilities throughout our branches and offices.

Workforce diversity and pay equity (103-1, 103-2, 103-3)

We value inclusiveness and diversity and we welcome people of all backgrounds to apply for positions within our organization. For applications from persons with disabilities we will actively seek to make any reasonable adjustments to our hiring practices to ensure fairness and equity.

We believe in rewarding innovation, supporting diversity and making a positive impact—socially, economically and environmentally. Vancity welcomes applications from all qualified job seekers from all skill levels and backgrounds. For applicants with diverse abilities, we work with them to make reasonable workplace accommodations that they may need for their best work performance.

The expertise and passion our employees bring to the organization are integral to our success and our compensation policies reflect the high value we place on their contributions. We strive to be informed and fair in setting base salaries and provide additional financial rewards to employees who demonstrate excellence and contribute to our success.

Employee breakdown by diversity (SDG-5, 8)

Women represented 63% of our workforce compared with 73% for Canadian credit unions that participate in the HR Metrics Service. At Canada’s six largest banks, women represented 58% of the workforce, as of 2017.

Vancity recognizes that binary statistics regarding gender are insufficient. In 2018, we implemented a new survey tool to better establish our current baseline for workforce diversity. We’ve also added a new reporting category: LGBTQ2S+ enabling participation of employees who self-identify as LGBTQ, Two-Spirit, transgender and non-binary. All employees are asked to participate in the survey, although disclosure of diversity information is voluntary. All employees have the option to “decline to answer” within the survey. The participation rate was much higher than in previous years, at 80%. For this reason, there are significant changes in diversity data from 2017.

Accurate diversity data helps us better reflect the communities we serve, better meet employee needs and ensures equitable employment opportunities and benefits.

We continue to work with our existing vendors to look at ways their systems can provide gender options beyond binary.

Performance management (103-1, 103-2, 103-3)

At Vancity, we align our vision and values with the needs of our members, so that our success helps to build healthy communities. A performance-planning cycle connects individual performance to organizational goals and helps each employee’s contribution positively impact the community in which they live and serve. Performance plans incorporate both strategic organizational goals and behaviours that reflect an employee’s accountabilities. Ongoing coaching and feedback is critical to supporting the growth and development of our employees.

Labour-management relations and human rights (103-1, 103-2, 103-3)

Collective agreements

We have collective agreements with two unions: The B.C. Government and Services Employees Union (BCGEU) and the Public and Private Workers of Canada (PPWC). We have 28 branches and three departments that are unionized.

We believe that open and intentional communications with our union colleagues can promote discussion, transparency and proactive problem-solving around both

issues and opportunities that impact communities, members, employees and our workplace. Vancity does not endorse or discourage unionization and recognizes that it's each employee's individual choice.

Our Employee Code of Conduct, Employment Equity Policy and Respect in the Workplace Policy set out procedures for making and dealing with employee complaints and any requisite corrective actions. Our collective agreements govern union employees and include formal procedures for resolving workplace issues. We track grievances and breaches of the Code of Conduct and report these quarterly to the Governance and Conduct Review Committee of the Board.

Operational changes (402-1)

To ensure continued industry competitiveness, at times we are required to make changes in the delivery of our services that result in changes to existing roles and/or the elimination of positions. We make every effort to retain the skills and knowledge of displaced people within Vancity through redeployment to alternative positions. During periods of transition, we are committed to open communications and we provide career transition support to assist impacted employees. Our Employment Transition Policy for non-union employees requires us to provide as much notice as possible to employees who are directly affected by proposed changes.

For unionized locations, the B.C. Labour Relations Code specifies that if an employer introduces or intends to introduce a measure, policy, practice or change that affects the terms, conditions or security of employment of a significant number of employees to whom a collective agreement applies, then the employer must give at least 60 days notice from the effective date to the trade union. Vancity abides by language in collective agreements with BCGEU and PPWC regarding terms, conditions and obligations for employment status changes affecting employees covered by these agreements.

Employee grievances related to labour practices

A number of previous year(s) outstanding labour practice incidents are awaiting mediation/arbitration while others continue to be discussed with the union in efforts to resolve.

Health and safety (103-1, 103-2, 103-3)

Robberies

We are committed to providing a healthy and safe workplace. As a financial institution, our most significant health and safety issue is the risk of robberies. We have extensive robbery training and security procedures as well as a robbery support program for affected employees. Our rules and safe-work procedures manual contains policies and procedures for workplace violence, including prevention and dealing with irate members or customers. Training for new hires in our branches includes a module on handling a robbery. An employee assistance program is available to all employees and their immediate families. It’s a voluntary, confidential, short-term counselling, advisory and information service available 24 hours a day, seven days a week, and includes a robbery recovery support program. We annually track and report robbery related incidents (four robberies in 2019), monitor the number of paid care days used per permanent employee and maintain records of employee training on health and safety.

Number of days lost due to employee illness (102-48, 403-2)

According to Statistics Canada’s Work absence report for 2019, the number of days lost per year for the Finance and Insurance sector was eight days. On average, men lost fewer days than women—6.5 versus 9.9 days respectively.

		BM	2019	2018	2017	2016	2015

Data has been restated to include unpaid care days taken.

Data includes permanent full-time and part-time employees.

Days lost due to illness includes time taken by employees to care for a sick family member.

Absenteeism rate is the number of workdays missed (lost) by employees due to illness or family care per permanent full-time equivalent.

Benchmark (BM) source: HR Metrics report for Canadian credit unions, 2019 median scores. Credit unions in the benchmark data have a short-term disability leave policy of four months versus six months for Vancity (so the number of days included for Vancity will tend to be greater in comparison).

Planet

Environmental sustainability (103-1, 103-2, 103-3)

One of Vancity's three guiding principles is to help ensure environmental sustainability for our members' lives and communities is enhanced. This involves providing clear environmental sustainability leadership in the financial sector. We are committed to action on five fronts:

- Reducing the environmental footprint of our operations
- Helping members and employees act by providing education and products and services that benefit the environment
- Enabling the community to act by financing and funding projects that reduce negative environmental impact
- Helping to build capacity and promote an enabling environment for environmentally progressive economic and community development
- Encouraging governments to implement public policy changes that reduce negative environmental impact

As a service-based financial institution, we do not manufacture any products, nor are we a large direct emitter of greenhouse gases (GHG). However, it is still important to our members that Vancity reduce the environmental footprint of our operations as much as possible and we expect our business partners to do the same. While we can't control which environmental programs are in place in the buildings we don't own, we try to work with our landlords where possible.

While maintaining a focus on GHG emissions, we have begun shifting towards a more holistic approach based on ecological footprint methodology, allowing Vancity to understand and consider the broader environmental impacts of our operations, products, and services while still measuring and accounting for our carbon footprint. Both internally and externally, the language of Lighter Living is used to communicate this holistic approach to an overall reduction in resource consumption and negative ecological impact.

For more on our approach see [2019 Annual Report](#), 'Environmental impact,' p. 21.

Examples of sharing our experiences with communities to help reduce climate footprints (SDG-12)

Project or initiative	Description
Zero Waste Events	Participating in community events has always been an important part of Vancity's community investment work. However, events generate significant waste. In 2019, we strengthened our commitment to supporting our community partners make the events that we take part in green. The Zero Waste Events program pairs local event hosts (non-profits, city events, festivals, etc.) with a trusted local partner to create a plan for the event to achieve zero waste, meaning all waste is diverted from landfill to reuse, recycle or compost. Through a three-year partnership, Vancity pays a portion of the consulting fees for the event host to work with their community partner and build their capacity to delivery a completely zero waste event. In 2019, we supported approximately one dozen events through this program and are now looking to increase impact by encouraging events to shift policies to prioritize reusable cups, dishes and materials instead of single-use items.

Greenhouse gas (GHG) emissions and premises energy use (103-1, 103-2, 103-3)

We've been [carbon neutral](#) since 2008 ♦. This means we measure and reduce our greenhouse gas emissions as much as possible, then offset emissions through the purchase of registered carbon offsets from emission-reducing activities that others have undertaken. To provide confidence that the offsets we purchase are high quality, we have robust offset criteria that we developed in consultation with external subject matter experts including the David Suzuki Foundation and the Pembina Institute. In 2019, the process for selecting carbon offsets was a direct award. The same criteria as previous years was employed to ensure that we maintain consistent standards for any carbon offset project that is selected.

We are guided by the World Resources Institute's GHG Protocol and we prepare our reporting on greenhouse gases in accordance with [ISO 14064 Part 1](#) and our own internal criteria for reporting. Our greenhouse gas emissions and carbon

neutral assertion are externally assured. For our purchases to offset 2019 greenhouse gas emissions, our [offset criteria](#) and our basis for GHG reporting, refer to our [greenhouse gas handbook and inventory report](#).

We focus our emission reduction efforts in four areas: employee commuting; premises energy use; paper use and business-related travel, including a small fleet of vans and cars.

We educate and engage our employees on how to reduce the greenhouse gas emissions from our operations through employee communication and awareness campaigns. We have incentives and programs to encourage employees to commute via sustainable transportation modes and we have a policy of locating our corporate offices near access to rapid transit.

GHG emissions by source (SDG-12)

Premises energy use: Emissions from energy use decreased seven per cent due to on-going efforts in implementing more energy efficient equipment and control system upgrades that use less natural gas.

Paper use: Emissions from paper use decreased 32% due to using more digital options with less paper printed for marketing collateral and campaigns. Although the percentage of post-consumer waste content in paper used also decreased, which would normally drive up emissions, the large reduction in paper consumption offset this.

Vehicle fleet: Vehicle fleet emissions decreased 17%. This was likely due to a decrease in the number of sites needing repair services, resulting in fewer kilometers driven.

Employee business travel by air and vehicle: Employee business travel emissions decreased 24% due to a decrease in the total number of flights taken, likely as a result of tighter budget management. The emission factors for flights also decreased, contributing to lower emissions.

Employee commuting: The primary reason for a seven per cent decrease in emissions was mainly due to a decrease in the number of employees working. A change to a more accurate methodology also had a small impact on the decrease. There was a slight increase in the average auto-related emission per employee trip in a week from 19.9 kgs. to 20.60 kgs. in 2019.

Materials and waste (103-1, 103-2, 103-3)

Our Environmental Policy states that we want to reduce our consumption of natural resources and production of waste, and to reuse and recycle resources and materials.

As a service-based organization, our major material input and output is paper. Paper use and quality is managed as part of our carbon neutral commitment. We have recycling and waste reduction programs along with a commitment to using

environmentally friendly office materials wherever possible, including office paper that is made from 100% post-consumer waste. Our printers are set to print double-sided. We have a comprehensive recycling policy and program covering paper products (including paper towels and disposable coffee cups, milk cartons, pizza boxes, etc.), as well as glass, cans, plastic, batteries, toner cartridges, fluorescent tubes, light bulbs, electronic equipment, furniture and construction waste. We also have a composting program.

We recycle, re-use or donate furniture that has reached the end of its life at Vancity. We donate computer or technical equipment to [Quantum Lifecycle Partners](#) (formerly GEEP), a provider of environmentally responsible electronics waste recycling. In addition, we have a list of environmental criteria for contractors to follow when renovating or building office locations. We also have criteria to cover other services. For example, we request paint made with low or no volatile organic compounds, and green products for cleaning.

54 of our 60 branches and Vancity Centre are net zero waste. Net zero waste means no waste is taken to the landfill. The little waste that we do have is taken to an energy plant and burned to generate energy and our compost is turned into soil.

Our Facility and Environmental Management department conducts waste audits every two years to measure and track the volume and type of outputs from our operations and employee activities. The results of these audits allow us to implement additional programs and engage suppliers and employees in efforts to reduce waste.

Paper use (301-1, 301-2)

In 2019, internal office paper use decreased by 16%. This decrease is likely due to a trend of employees making bulk purchases in alternating years. Other paper use decreased 40% due to continued efforts in utilizing more digital options, less printed marketing materials and the increasing adoption of member e-statements. Overall, total paper use decreased 36%. The percentage of recycled content in paper used also decreased 15 percentage points due to challenges sourcing recycled content paper as a result of a shortage in the paper industry.

t = metric tonnes; kg = kilograms

Data prior to 2017 has been restated due to restated FTE numbers. See employee profile table for details, p. 9.

Paper use is based on amount of paper purchased. Internal office paper includes: letterhead, copier, printer and fax paper. Other paper includes: member statements, marketing materials, communication to members, business cards and envelopes.

Waste generated, recycled and diverted from the landfill (102-48, 306-2)

In 2019, 100% of our waste collected from locations in the Net Zero Waste Program was diverted from the landfill. Our efforts in educating employees on proper recycling and more frequent weighing and tracking of our waste streams resulted in an eight per cent decrease from previous year. We have a battery recycling program available to our members and employees through which we collected 1.8 tonnes of batteries in 2019.

Total waste diverted ◆	%	100	99
Waste to landfill	%	0	1
Total waste (actual and estimated)	t	187	203 ¹
Waste per employee (FTE)	kg	79	83

t = metric tonnes; kgs = kilograms.

¹ Data was restated due to a new methodology to include estimated waste at locations where there were no tracking systems in place.

Data from locations with tracking systems was used to calculate the percentage of waste by type. In 2019, one office tower and 54 branches in the lower mainland had tracking systems in place. One tower location had tracking systems for three of the four waste streams. Where there was no or minimal tracking systems in place due to a different waste service provider, waste was estimated. Waste was estimated for the remaining locations: two office towers (plus partial estimation for one office tower) and six branches in the lower mainland using the waste per full-time equivalent (FTE) calculated from the sites with data and multiplying this by the number of FTE's at the location to be estimated. The four main streams of waste materials include: glass, metal, and plastic; all fibre materials such as paper; compost; and waste that could not be recycled.

Water (103-1, 103-2, 103-3)

In 2019, we improved the accuracy of the water data we collect by increasing the number of locations with submeters from 23 to 31. The implementation of more efficient fixtures along with more accurate measurements resulted in a 16% decrease in the total estimated water use.

Total estimated water use per employee (thousands of litres per FTE) ♦	m ³	11.0	12.8	n/a¹	n/a	n/a

m³ = cubic metre. All water is obtained from municipal water supplies.

¹ Methodology was revised to set a baseline prior year unaudited results are not comparable. Metered water use is based on data from 31 locations (29 branches and two office tower locations). Remaining 31 branches and two office locations are estimated. We estimated the water use of each non-metered location by multiplying the average annual water use per FTE from similar metered locations according to building type (office or branch) and features (e.g. community room) by the FTE of the unmetered location and then prorating for the number of days the location was in operation.

Buying local (102-9, 103-1, 103-2, 103-3)

Vancity's supply chain is labour-and-technology intensive and 89.5% of our 1,028 suppliers are based in Canada.

- **Supply**: focuses on the acquisition of deposits from members, and providing support services and products for operations. The types of suppliers we typically engage are providers of information technology solutions, consultants and specialized services for financial institutions.
- **Transformation**: focuses on investing with impact to improve members' financial well-being and developing healthy, sustainable communities. Transformation primarily involves the core banking system and support products and services, including investing with impact on behalf of our members.
- **Distribution**: focuses on ensuring our financial products and services reach our members and clients. Distribution channels include 60 branches in B.C.: Coast Salish and Kwakwaka'wakw territories (Metro Vancouver, Fraser Valley, Vancouver Island and Squamish-Lillooet regions), telephone, online, mobile banking and mobile in-person services.

Community impact loans (FS7, FS8)

We seek to do business with organizations or fund projects that align with our three guiding principles of co-operative principles and practices, social justice and financial inclusion, and environmental sustainability.

We have a variety of community impact lending programs. Broadly speaking, community impact loans are those we provide to specific types of organizations or within specific sectors that we believe improve the well-being of people and the community. We have internally developed [guidelines](#) to help guide what we categorize as community impact loans. Loans can be commercial real-estate loans, business loans (including loans to not-for-profit organizations, social enterprises and co-operatives) or micro-loans. The outstanding balances from these loans form part of our triple bottom line assets, see p. 23.

Community grants (FS7, FS8, PAS)

As well as financing, we provide grants to help organizations. The goal of our grants is to support not-for-profits, social enterprises and impact businesses build capacity and increase knowledge to help them reach their mission and/or financial goals, while helping to build a vibrant community. In 2019, we approved grants for 451 not-for-profits and impact businesses totaling \$10.4m.

Ethical Principles for Business Relationships (103-1, 103-2, 103-3)

Who we choose to do business with and lend to has a deep impact on our members' communities.

Our Ethical Principles for Business Relationships (EPBR):

1. We value accountable and sustainable business leadership that engages in co-operative principles and practices.
2. We value economic and social inclusion for all people.
3. We value strong and resilient communities.
4. We value environmental and sustainability leadership.

🔗 Ethical Principles for Business Relationships vancity.com/EthicalPrinciples

For every business relationship we enter into, we look for alignment with our Ethical Principles for Business Relationships and we look for ways to promote positive social, economic and environmental practices. Applying the Principles gives our employees the ability to have values-based conversations with business partners to truly understand how they contribute to their communities and to ultimately make decisions about who we choose to partner with to build healthy communities together. Where possible, we aim to help move organizations along the spectrum into greater values-based alignment, rather than screening out. Our relationship managers determine the alignment along with support from Procurement and Contract Management.

Our procedures are risk-based: the more significant the relationship in terms of dollars or profile, the deeper the level of analysis performed. Assessment procedures have been integrated into existing policies and procedures where possible, such as lending, account opening, and purchasing policies and procedures. Vancity Internal Audit may periodically check performance. Training and coaching resources are available to all employees to develop their skills for asking thoughtful and engaging questions and having meaningful conversations.

Ethical Principles assessments consider the following criteria when determining alignment: ethical business practices; environmental, social, and community impact; environmental policies, practices, services and products; employee relations; supplier relations; labour practices; workplace conditions; community investment and partnerships; diversity; human rights; involvement in and exposure to controversial industries; sectors; and business practices.

Assessments for new strategic relationships (308-1, 414-1)

In 2019, we assessed 39 potential new strategic relationships and three were awarded contracts; one new strategic relationship was screened for the first time in 2019.

Total Ethical Principles assessments for new strategic relationships	#	4	2	2	1	2
Strategic suppliers	#	3	2	1	0	2
Other strategic relationships	#	1	0	1	1	0

Strategic relationships have one or more of the following attributes: high financial or reputational risk, an expenditure of more than \$250,000 annually, an outsourced relationship or a designated Business Continuity Plan key business partner. Strategic relationships include business and treasury relationships.

Managed purchases: goods and services procured by Vancity, for which decision-making and oversight are performed internally. These don't include spending related directly to payments made to the government, (municipal, provincial or federal) or costs associated with the lease of premises where Vancity has a place of business.

Ethical principles assessments for existing strategic relationships

In 2019, the Risk Management Committee approved calibration of the cadence and scope of the treasury relationships and suppliers reviewed for EPBR to focus on key industries, and our most critical third-party relationships staying within our enterprise risk framework and our board-approved risk appetite.

As a result, we now assess existing treasury relationships every three years, and all strategic supplier relationships once every two years, with a focus in outsourced relationships. In 2019, 16 relationships were due for assessment and we completed assessments for all of them.

Shared Success allocation to members and communities

Each year, we give back the equivalent of 30% of our net income through our Shared Success program. We share net income with our members in the form of share dividends, loan rebates and bonuses on deposits and investments (\$9.15m), and with our community in the form of grants and donations, (\$9.15m). This includes an annual donation to the Vancity Community Foundation. The Foundation is a registered charity that is not a subsidiary of Vancity, with its own

Board of Directors and is not included in Vancity's consolidated balance sheet. It makes grants to charitable organizations and delivers charitable programs.

Affordable housing (103-1, 103-2, 103-3)

At Vancity, we hear from our members every day that access to affordable housing is among their most pressing concerns. It's affecting their quality of life and the well-being of our communities.

In British Columbia, there is a backlog of nearly 80,000 new rental units needed to address current demand for affordable rental housing. The province needs an average of 7,000 new rental units a year to accommodate for projected growth in population. In our own trade region, almost half of renter households are paying more than 30% of their income on rent and utilities. And significantly, one in five renter households in Metro Vancouver are spending more than half their income on rent and utilities, leaving them with little disposable income. Our members include these renter households. Our members also include community housing operators who are working to support people living along the housing continuum from emergency and homeless shelters, through to transitional housing, subsidized

housing, co-operative housing, below market rental housing, life leases, and property ownership.

For more on our approach to affordable housing, see [2019 Annual Report](#), 'Affordable housing,' p. 33.

Examples of Vancity's collaboration with other organizations in support of affordable housing in 2019 (SDG-11)

Organization	Description of collaboration with Vancity
BC Non-Profit Housing Association	Vancity partnered with the BC Non-Profit Housing Association to offer the IAP2 Foundations in Public Participation Course to 23 community housing sector organizations. The program is designed to increase community engagement and support for affordable housing. Through this partnership we also delivered our first Vancity Housing Impact Talks event, as part of a pre-Housing Central conference.
Metro Vancouver and TransLink	Vancity partnered with Metro Vancouver and TransLink to develop a Rail-Volution Regional Forum to gather regional transportation, planning and sustainability professionals, not-for-profit organizations, and advocacy groups in a discussion about the intersections between transportation, affordable housing, climate change and equity.
15 Community Housing Organizations	Vancity delivered two "Building It Right" workshops designed to help organizations assess their readiness and develop a real estate vision that can help guide subsequent affordable housing development decisions. There were 45 participants from 15 organizations, including two First Nations.

Paying a living wage (103-1, 103-2, 103-3)

As well as being a living wage employer ♦, we've been calling on other organizations to join the living wage movement and are pleased to have been involved in a number of credit unions across the country joining the campaign.

Entry-level employee hourly wage compared with British Columbia's living wage (201-1, 203-2) (SDG-8)

Vancity is a certified living wage employer. This means we make annual living wage rate adjustments in what we pay our employees. The Metro Vancouver living wage was \$19.50 per hour in 2019, inclusive of benefits. This is the minimum hourly rate that would be paid to meet basic living needs.

Vancity includes benefits in addition to base pay as part of a total compensation package. This means the equivalent hourly living wage we need to pay employees to be living wage compliant is reduced to reflect "credit" for these benefits.

We are fully compliant in paying eligible employees (full time, part time and casual employees) a living wage. Employers are allowed to have a small number of trainees or student co-ops that are not eligible for the living wage. We're also working closely with key suppliers and contractors to support them in paying their employees a living wage.

The living wage rate decreased from \$20.91/hr in 2018 to \$19.50/hr. However, Vancity continued to pay its contracted suppliers, existing contracts, and new contracts the living wage rate of \$21.73/hr; and its permanent employees at the rate of \$20.91 /hr, which is above the Metro Vancouver living wage rate.

Vancity entry level employee hourly wage for non-permanent/contract employees

We don't provide non-permanent employees with benefits, with the exception of a vacation allowance. In 2019, we paid non-permanent employees a minimum of \$20.50 plus a vacation benefit. Living wage assumes a minimum amount of vacation time off or equivalent vacation paid in lieu (equivalent to 70 hours). Vancity offers vacation time or vacation time in lieu equivalent to 105 hours (35 hours in excess of the living wage ceiling). The additional week that Vancity offers our employees is considered a benefit that is equivalent to \$1.23/hr.

		2019	2018	2017	2016	2015
Non-permanent entry level employee hourly wage	\$	20.50	20.50	20.12	20.12	20.12

Non-permanent entry level employee hourly wage plus vacation allowance	\$	21.73	21.73	20.68	20.68	20.68

Vacation benefit is based on vacation leave available to employees beyond 70 hours.

Governance (102-29, 102-30, 102-31)

The Board of Directors has overall responsibility for the establishment and oversight of Vancity's risk management framework. The Board has established six committees to oversee and manage Vancity's exposure in specific areas of risk. The Risk Committee's role is to provide effective oversight and advice to the Board in relation to current and potential future risk exposure and future risk strategy. It ensures management has established, and follows, an enterprise risk management framework which includes the establishment of risk appetite by risk dimension and appropriate policies with respect to the risks to be taken, the level of risks and the monitoring of compliance to those policies. It meets at least four times a year and reports to the Board.

🔗 Board Committees vancity.com/Committees

The Board considers the legitimate interests that stakeholders such as employees, suppliers, members and communities may have in Vancity. It calls on expert advice to offer an opinion when required. It receives reports of insights from various engagements with members and others, such as results of surveys and focus groups. All this may influence Directors' views of risks and opportunities.

A senior management committee structure provides effective oversight and risk management of the principal risks affecting Vancity. The Risk Management Committee consists of: the Chief Executive Officer; Chief Risk Officer, Chief Member Services Officer; Vice President of Community Member Service; Vice President; Enterprise Intelligence and Data; and the Senior Strategic Management Consultant.

Board diversity (102-22, 103-1, 103-2, 103-3, 405-1)

According to the Canadian Board Diversity Council's [2018 Annual report card](#) for FP500 Boards, women comprise 24.5% of Boards. Based on self-reporting, the report card showed 5.9% belonging to a visible minority group, 7.6% aged 30-49, 92.4% aged 50 and over and 0% under 30. The representation of women on boards in the finance and insurance sector accounted for 33.1%.

Vancity's Board of Directors is elected by our members. Data is based on nine board members. Additional Board of Directors diversity segment tracking was introduced in 2019

Risk management

We see risk management as an opportunity to generate insights and achieve positive impact on a large scale. We need to maintain our reputation as a leader in driving social change through a disciplined approach to decision making and focused attention on reputational impact. We also need to ensure members continue to have confidence in Vancity.

In fulfilling our vision, we take calculated risks to seize opportunities to fulfill our strategic intent, while rigorously managing risks that could potentially harm or disrupt our community ecosystem of members, communities, and Vancity. To ensure our business model is sustainable, we have a low risk appetite in areas that would not add value for our members and/or those that could lead to breaching regulatory requirements or excessive financial or reputational risk. However, we willingly accept greater risk in other areas that enables us to innovate and advance us to meeting our strategic objectives. In other words, we clearly articulate the amount of acceptable risk we want to take in each of our risk dimensions. We recognize that our risk appetites are different for each area of the business and require specific risk appetite statements and metrics for each.

In 2019, we continued to improve and evolve Vancity's Enterprise Risk Management (ERM) program. Most notably, we revised the Risk Appetite

Framework by increasing alignment with our strategy and added risk indicators with set risk tolerance limits. The risk indicators act as a "warning system" to notify if and when we are trending outside of our desired risk tolerance. The practicality of this framework comes to life when leaders across the organization can use it as a tool to recognize when we may be falling outside of our risk appetite under specific risk dimensions. And when reviewing strategic projects, it may be the case that a project breaches the risk appetite of one or two risk dimensions. In this scenario, it does not mean the project is now deemed no-go, it just means that we are aware that we are taking more risk in a certain area but at least this drives an "eyes wide open" approach to our decision-making process.

To keep a balanced focus on innovation, strategy and risk, our executive-level decision-making structure is designed to look at our strategy and our need for innovation with a deeper understanding of risk. This gives us the ability to be bolder, within the parameters of our regulatory requirements as defined in our risk appetite framework.

Lending (102-11)

Because we have deep roots in relationship banking and understand the needs of the real economy, we see some risks differently.

We manage key lending risks, including social and environmental risks, through our lending and investment policies, which are aligned to our Ethical Principles for Business Relationships. Beyond risk management, we take a proactive approach to lending and seek to do more business with organizations that benefit their communities.

Our Lending Policy requires us to consider social and environmental issues. Environmental risk procedures require employees to exercise due diligence in identifying environmentally risky situations. Loan underwriting must include an assessment of the potential financial, legal and reputational risks associated with these issues. We reserve the right to decline financing for business/commercial activities that, while technically in compliance with laws and regulations, may have significant adverse environmental or social consequences.

Social and environmental risks of business banking loans and commercial mortgages are assessed at the time of the loan application, guided by our Ethical Principles for Business Relationships and lending policies, and subject to environmental due diligence. When managing risk for lending to any type of business, we take additional precautions, such as more frequent and in-depth monitoring. For commercial mortgages and our larger business banking loans, site

and/or business visits are a mandatory pre-funding condition. These visits can identify environmental and social issues.

Our personal, commercial and business lending areas are subject to internal audits scheduled based on the degree of risk they pose. To the extent that regulatory and strategic risks are addressed by environmental and social policies, the controls that ensure compliance are reviewed and tested by Internal Audit, as required. Staying abreast of changes in the external environment and developing the capabilities necessary to address these is integral to maintaining our professional standards. Online training on the Ethical Principles for Business Relationships is available to all employees.

Climate change risk

As a pioneer of values-based banking, Vancity has long recognized climate change and society's response as critical issues. We believe the need for climate action is urgent, and we are committed to advancing the transition to low-carbon future.

This is Vancity's first report aligned to recommendations of the Financial Stability Board's Task Force on Climate-Related Financial Disclosures (TCFD). It covers our approach to managing climate-related risks and opportunities. Like others in the financial sector, we are in early stages of this work and expect to provide increasingly robust disclosures in future.

Board and senior management pay

Board remuneration (102-35, 102-36, 102-37)

Director remuneration is usually approved every three years by the membership at the Annual General Meeting (AGM).

The Directors' Remuneration ad hoc Committee reviews Director remuneration and makes a recommendation to members for approval. This Committee comprises three appointed general members who are unaffiliated with, and independent from, the Vancity Board of Directors. The committee reviews Board Directors' remuneration to ensure it continues to be appropriate for the credit union and reflective of the level of responsibility our Directors hold, and the expertise and time it takes to carry out those responsibilities.

For more on our approach to Directors' remuneration, including each Director's remuneration and expenses, see vancity.com/BoDAnnualReporting

Senior management and CEO compensation (102-35, 102-36)

The Board of Directors has the responsibility for monitoring and evaluating the performance of our President and Chief Executive Officer (CEO) and for determining the President and CEO's compensation. The Board sets a compensation philosophy for Vancity and ensures that the compensation for the President and CEO, and senior management, is appropriate in relation to organizational needs and sector comparisons. The Board's Human Resources Policy and CEO Compensation Committee leads the evaluation and compensation process for the President and CEO.

Examples of how we engage with our stakeholders (102-40, 102-43)

Members are both Vancity’s owners and customers, and our most important and influential stakeholders. Other key stakeholders include employees (who are also members and owners), the communities in which we operate and our regulators.

We use a variety of formal and informal approaches to gather feedback, discuss issues and collaborate with members, employees, peers, community groups and thought-leaders. Many of our employees, leaders and Board Directors meet regularly with members through their day-to-day work, at community events or through volunteering.

Key stakeholders and ways we engaged with them in 2019	
Members	<p>Insights: Online member panel, post-transactional surveys, focus groups, social media</p> <p>One-on-one: through our branches, by phone, in writing and online, our employees are available to listen and respond to members. Providing financial literacy workshops for retail and business members (Each One, Teach One, etc.)</p> <p>Co-operative governance: members can speak with Directors, be a candidate in and vote in Board Director elections, and attend and make resolutions at the Annual General Meeting</p>
Employees	<p>Insights: Surveys, interviews, focus groups</p> <p>Internal engagement: intranet, manager/divisional/ team meetings, Orientation-Immersion, quarterly performance updates with executive and managers, surveys, focus groups, executive branch visits</p> <p>One-on-one: managers are encouraged to meet regularly with their direct reports and also their direct reports’ direct reports.</p>
Community	<p>Insights: surveys and focus groups on an ad-hoc basis</p> <p>Partnerships: Longstanding partnerships with many community groups</p> <p>One-on-one: meet regularly with community groups. Provide grants and sponsorships to not-for-profits and community groups. Regularly participate in community events. Many Vancity employees sit on the Boards of community groups or are involved in working groups.</p>
Regulators	<p>Meet and correspond regularly with our regulators. Formally report on performance and respond to their questions.</p>

Other stakeholders and ways we engaged with them in 2019	
Competitors and peers	Work with peers on issues of common interest through industry and other working groups and committees, including Central 1 and the Global Alliance for Banking on Values
Suppliers and business partners	“Request for proposal” process. Ethical Principles for Business Relationships. Our supplier relationship managers have meetings as needed to discuss contractual obligations and delivery, as well as providing information on becoming a Living wage employer
Public interest groups	Fund and/or work together on advocacy initiatives. Monitor and respond to specific issues as they are raised.

Identifying stakeholders (102-42)

We last revised our categorization of stakeholders in 2011 when we undertook a comprehensive inventory of how we engaged with stakeholders. We conducted a formal stakeholder mapping exercise in 2009 as part of an in-depth materiality process.

Key topics and concerns that have been raised through engagement (102-44)

For topics members raised in discussion and rated most important for Vancity to focus on, see [‘Material topics and determining report content,’](#) p. 36.

For which stakeholders are most impacted by each topic and where to find our responses to material topics raised, see [‘Material topics and boundaries,’](#) p. 37.

Public policy and advocacy (103-1, 103-2, 103-3)

As a member-led, values-based financial institution, Vancity works in concert with community and corporate partners and all levels of government in support of vibrant, resilient and healthy communities. All advocacy opportunities are filtered through our organizational business plan to determine their ability to influence systems change in priority areas of importance to our members and communities. A Board-level policy governs political activities. Vancity is a non-partisan organization and does not permit the use of corporate funds to provide political contributions. This is all underpinned by Vancity’s commitment, as a core value, to embedding the Truth and Reconciliation Commission’s reconciliation framework in every facet of our work.

Compliance (103-1, 103-2, 103-3)

Vancity is regulated by the B.C. Financial Services Authority (BCFSA), an agency of the B.C. government. Vancity Community Investment Bank is federally regulated by the federal Office of the Superintendent of Financial Institutions (OSFI). Citizens Trust is regulated both provincially by BCFSA and federally by OSFI.

Our goal is to be aware of and have procedures in place to check compliance with applicable laws, regulations, legislation and codes of conduct. As part of the normal course of business, Vancity occasionally faces legal proceedings. Updates on significant litigation are reported to the Board’s Audit Committee quarterly. Provisions are recorded in the financial statements where appropriate.

For our policies on money laundering and terrorist financing, see vancity.com/MoneyLaunderingTerroristFinancing

Percentage of employees who reviewed and signed Vancity’s Code of Conduct (102-17, 205-2)

All employees are required annually to review and sign off on a Code of Conduct, which necessitates adherence to a high standard of business ethics. We have a process to monitor that this gets done. The Code also sets out the reporting responsibilities of employees, should they observe anything that appears to violate its terms. Our anonymous and confidential whistle-blower system is provided by an external third-party and is intended to provide employees and members with an avenue to report concerns about serious business misconduct.

In 2019, the annual Code of Conduct declaration resulted in a return rate of approximately 96%. The desired state is a 100% return rate. Due to various leaves of absence and employee turnover, some inherent challenges exist in achieving this outcome. We continue to work with people leaders to highlight the importance of ensuring that employees understand and abide by the Code.

Number of internal fraud incidents investigated (205-3)

Employee dishonesty is covered in the security training given to new employees whose jobs require it. Representatives from our Corporate Security department periodically meet with groups of branch managers to raise awareness of employee dishonesty and provide guidance in managing incidents. Our Employee Dishonesty policy requires that all incidents of employee dishonesty are reported for investigation. If substantiated, the employee could be dismissed. We report incidents of employee dishonesty and/or breach of conduct to the Audit Committee and Governance and Conduct Review Committee, who monitor for any significant breakdown in controls and/or business ethical issues. There were three substantiated incidents in 2019, all resulted in progressive discipline, warning and/or termination.

Reporting principles and other information

Reporting principles

We apply the following principles to the data we report:

- We report data for Vancity unless otherwise stated. Vancity refers to Vancouver City Savings Credit Union and its subsidiaries – see [2019 Annual Report](#) 'Structure and executive leadership team,' p. 39.
- We report data for the calendar and fiscal year January 1 to December 31 with the following exception: we report energy and water data for the previous year's fourth quarter to the current year's third quarter. (For example, 2019 energy data is reported for the period October 1, 2018 to September 31, 2019).
- We include five years of data where comparable and available (for new indicators added in the reporting year as well).
- If data increases or decreases by a material amount from the prior year, or if over five years data is trending up or down, we include an explanation in the accountability statements or in the business review of Vancity's [2019 Annual Report](#). We consider a material amount to be either +/- five per cent, or an amount we or our third-party survey providers consider to be a statistically significant variance for survey results.
- We include external industry benchmarks from sources we consider to be reliable, where meaningful and available, to provide context for our performance.
- We disclose in the table notes if data is estimated or based on extrapolation, and we provide details of the estimation or extrapolation.
- For relevant disclosures, we follow the protocols contained in the GRI's sustainability reporting standards unless otherwise stated. When requirements under the protocols change, we restate data and include a minimum of three years of data, where available.
- We're continuously improving our non-financial data tracking and reporting processes. Sometimes this means that while data quality improves, we may lose comparability of data over time. In these cases, historical data is either omitted, recalculated (if possible) or included with an appropriate table note if we think showing the historical data is of value. We indicate restatements and omissions of data in the table notes.

Survey data

The following describes some of the key surveys we use to gather data.

Member relationship health survey: A confidential telephone survey conducted quarterly by Sentis Market Research Inc. We report the fourth quarter (December) score or percentage of members responding nine or ten from a scale of one to ten. We interviewed 800 members in the fourth quarter of 2019. See data tables with specific scores, margins of error and levels of confidence.

Member Services Centre quality tracking survey: A telephone survey administered by SQM Group. Call centre customer satisfaction (CSat) is the percentage of members who answered “very satisfied” (top box response) about their overall call centre experience. We report a year-to-date (as of December 31) cumulative score. The margin of error in 2018 was +/- 1.8%.

Vancity transportation survey: An annual confidential online commuting survey administered in the fourth quarter of the year by Acuere Consulting. We report the percentage of employees responding that they took a sustainable mode (walk, bike, carpool, transit) in their work commute. The margin of error was not available.

Employee Engagement Score: The score is derived by Kincentric (survey administrator) as the percentage of employees with a score of 4.5 out of 6 on six standard questions asked in the survey.

Verification of key performance and impact data

Data for performance and impact measures, below in **bold**, were verified to a reasonable level of assurance. The remaining measures were verified to a limited level of assurance by KPMG LLP. We selected these measures to be assured because they are strategic measures with organizational targets and relate to our material topics, where quantifiable.

- **Carbon footprint per full-time equivalent**
- Percentage of employees who self-identify as Indigenous
- Number of people assisted with products and services designed to provide access to basic financial services, affordable housing, credit and credit repair
- Recertification as a living wage employer
- Percentage of waste recycled or diverted from the landfill
- Water use per employee

We have included detailed explanations of the methodology used to measure our performance and impact throughout these accountability statements, in the [glossary](#) and in the [greenhouse gas handbook and inventory report](#).

Changes in measures from 2018 (102-49)

The following list includes measures we changed or discontinued in 2019.

Added, because it was added as a target in the 2019 business plan:

- Return on average members' equity (ROME) – business results

Discontinued, because they were not 2019 business plan targets:

- Members who do not report a problem
- Contribution to well-being: the degree to which members believe Vancity has had a positive effect on their well-being
- Net growth funding ratio

Material topics and determining report content (102-46)

We follow a number of international reporting standards and frameworks and we include specific material topics in our annual reporting, placing greater emphasis on the most material.

Under the AA1000 AccountAbility Principles Standard, material topics “influence the decisions, actions or behaviour of stakeholders or the organization itself.” The Integrated Reporting Framework requires that we include “information about matters that substantively affect the organization’s ability to create value over the short, medium and long term.” Similarly, this report and the accountability statements include “topics that reflect the organization’s significant economic, environmental and social impacts; or substantively influence the assessments and decisions of stakeholders,” as laid out by the Global Reporting Initiative’s (GRI) Sustainability Reporting Standards.

Each year we review and update the set of material topics and corresponding measures to include in our annual reports. To inform our annual review, we maintain a running list of relevant topics, which captures key risks, opportunities and events. It includes topics that affect or could affect Vancity’s direct short-term financial performance, our ability to deliver on our vision and strategic priorities, or our ability to create value or positive impact in the long term.

We include the most material information in our integrated annual report, and supplementary information in these accountability statements, the [Consolidated financial statements](#), [Greenhouse gas handbook and inventory report](#) and a [Glossary](#).

For 2019’s reporting, we focused on the priorities our members asked us to concentrate on. These member priorities – financial literacy, access to basic financial services, affordable housing, the living wage and household and personal debt – influenced our choice of material topics.

Our business strategy and discussions with Board Directors and executives also informed the choice of material topics. We considered feedback on our previous reporting from member and employee focus groups and surveys. Members told us our reporting covers topics they want to know about.

The Audit Committee of the Board of Directors receives the annual report plan (which includes topics to be disclosed) and the corresponding set of performance measures. The Board approves the annual report and accountability statements prior to their release. Our external assurance provider also conducts its own process as part of its AccountAbility AA1000 assurance procedures to ensure we have determined the relevance and importance of topics to Vancity and key stakeholders and have prioritized the material topics and responded to them strategically.

Our Annual report is aligned with the [International Integrated Reporting Framework](#) and is also prepared, including the accountability statements, in accordance with the [Global Reporting Initiative’s \(GRI\) Sustainability Reporting Standards](#), Core option.

Material Topics and boundaries (102-47, 103-1, 103-2, 103-3)

We feel it's important to use the same language in our public reports as we use internally. We've translated the topics included in the GRI Sustainability Reporting Standards into those material topics that make sense to Vancity and our members. For each topic, we've identified where its main impacts occur. We used this to decide the boundaries of what to report for each topic, with higher priority topics receiving more coverage in the integrated annual report and additional disclosures in these accountability statements.
